Healthy Ecosystems for Rangeland Development

Healthy Ecosystems for
Rangelands Development

ABOUT

Healthy Ecosystems for Rangeland Development

HERD builds on the sustainable management of pastoral rangelands for the provision of ecosystem services and protection of biodiversity. The concept of HERD is being consolidated through this project on the back of numerous projects, programs, initiatives, studies, scientific articles and policy papers.

PROJECT'S COMPONENTS

- Provision of evidence-based technical assistance.
- Institutional strengthening for rangeland governance.
- Up-scaling of good practices in Sustainable Rangeland Management (SRM).
- Promoting SRM knowledge management, including at the global and regional levels.

IMPLEMENTED BY:

UN Environment Programme

EXECUTED BY:

IUCN Regional Office for West Asia (ROWA)

IN COOPERATION WITH:

- The Hashemite Fund for the Development of Jordan Badia (HFDJB)
- The Royal Botanic Garden (RBG)
- The Desert Research Center (DRC)
- The Center For Environment and Development for the Arab Region and Europe (CEDARE)
- Ministry of Environment in Jordan
- Ministry of Environment in Egypt

ABOUT HERD

The four-year GEF project focuses on desertification of pastoral rangelands in Jordan and Egypt. In addition, the project aims to catalyze the scaling-up of HERD, both regionally and globally. HERD aims at strengthening restoration and sustainable management of pastoral rangelands for the provision of ecosystem services and protection of biodiversity in Egypt and Jordan and catalysing scale up regionally and globally.
