Bureau of the IUCN Council

12th Meeting (virtual) - 7 March 2024 – 12:00 to 14:00 UTC

Agenda

Agenda Item 1: Introduction by the President and approval of the agenda

Agenda Item 2: Appointment of the members of the Congress Preparatory Committee (CPC)

By decision C110/11, Council approved the ToR of the Congress Preparatory Committee (CPC). On 18 December 2023, Council members were invited to express their interest to be part of the committee by the deadline of 15 January 2024 which was subsequently extended to 29 January 2024. The ToR request the Bureau to appoint the members of the CPC on the proposal of the Vice-Presidents by 15 March 2024. The Vice-Presidents, acting as Nominating Committee under Regulation 48 (c) will make a recommendation to the Bureau taking into account the criteria defined in the ToR. The next step is for Bureau to appoint, by 1 August 2024, three additional members nominated by IUCN Members which will be part of CPC when acting as appeals body for motions referred to the electronic debate and vote on motions held prior to Congress.

Agenda Item 3: Appointment of the members of Council's Nominations Committee

By decision C110/11, Council approved the ToR of the Nominations Committee. On 18 December 2023, Council members were invited to express their interest to be part of the committee to the Vice-Presidents by the deadline of 15 January 2024 which was subsequently extended to 29 January 2024. The Vice-Presidents, acting as Nominating Committee under Regulation 48 (c) will make a recommendation to the Bureau taking into account the criteria defined in the ToR.

Agenda Item 4: Approval of the Terms of Reference of the Election Officer and the Deputy Election Officer

By decision C110/11, the Council deferred the approval of the Terms of Reference of the Election Officer /Deputy Election Officer of the 2025 Congress until after the close of the vote on proposed amendments to the Statutes making the Congress a fully hybrid event. At its 13th meeting held on 25 January 2024, the Governance and Constituency Committee (GCC) approved a recommendation to Council for approval of the ToR of the Election Officer/Deputy Election Officer taking into account the results of the Members' e-vote adopting the amendments to the Statutes. The next step will be for WCEL's Steering Committee to nominate four candidates for the purpose of the Bureau nominating one of them to the IUCN Council as candidate Election Officer and another one as candidate Deputy Election Officer.

- B12/4/1 GCC13 Outcomes and recommendations to Council 25 January 2024, in particular Annex 3 (with track changes)
- B12/4/2 ToR Congress Election Officer and Deputy Election Officer CLEAN w.1 additional change

Agenda Item 5: Approval of new membership applications

At its 13th meeting held on 25 January 2024, the GCC made recommendations to Council for approval of new membership applications, and to note the name change of an NGO Member and the reactivation of the membership of a State. The GCC recommendations regarding the change of Member category have been submitted directly to Council for approval by email as required by Regulation 21.

Documents:

- GCC13 Outcomes and recommendations to Council (25 January 2024), in particular Annex 1 and 2

Agenda Item 6: Appointment to the Steering Committee of WCPA

On 9 February 2024, the Chair of WCPA submitted a request to Bureau for approval of the appointment of an additional member of the Steering Committee of the World Commission on Protected Areas (WCPA).

Documents:

- B12/6/2 Note Chair WCPA with CV and EOI Dr Stephenson

Agenda Item 7: Criteria for Council meetings held in-person outside IUCN's Conservation Centre

The Secretariat is suggesting to adjust the criteria for holding Council meetings outside IUCN's Conservation Centre in Gland last approved by Council in 2011.

Documents:

- B12/7/1 Criteria for Council meetings held in-person outside the IUCN Conservation Centre

Agenda Item 8: Date and place of the 112th Council meeting (5-7 November 2024)

By decision C107/25 (May 2022), Council established the dates for C112, which now happens to be in the week between the close of the CBD COP and the opening of the UNFCCC COP and to coincide with the 4th World Urban Forum. Holding C112 earlier will be a challenge because of the RCF and the IUCN World Leaders' Forum in September/October 2024. Options for postponing C112 to a later date are limited to the w/c 25 November 2024 (between the end of the UNFCCC COP and the opening of the UNCCD COP) unless January 2025 is considered.

If Bureau accepts the revised conditions for holding a Council meeting outside the IUCN Conservation Centre (Agenda Item 7), it means that a final decision on holding C112 in the Regions will have to be approved at C111 in May 2024. To avoid travel from CBD COP in Colombia to C112 in Gland and onwards to UNFCCC COP in Azerbaijan, consideration may be given to holding C112 in Colombia or Azerbaijan.

Comments from Council members have been compiled in this note.

Agenda Item 9: Draft Agenda of the 111th Council meeting (14-16 May 2024)

As in September 2023, Bureau is invited to review the draft agenda for the forthcoming Council meeting C111, indicating in particular which items to discuss during the virtual Council meeting preceding the in-person meeting. A Doodle poll has been launched to determine the dates for the (max. 3-hour) virtual meeting (options: 23, 24, 29, 30 April and 1, 2 May 2024).

On the question whether to extend the duration of Council with an extra day of plenary meetings, during Bureau B11 in September 2023, it was *"agreed to consider this question after the 110th Council meeting taking into account the experience at Fontainebleau in terms of the effectiveness and efficiency of the meeting."* (extract from the summary minutes of B11) A decision on a possible extension of C111 is required soon in order to allow Council members to make their travel arrangements and the Secretariat to adjust the contracts with suppliers (hotels, audiovisual equipment, interpreters, local transport).

IUCN Council's Global Focal Person for Oceans

Terms of Reference

BACKGROUND

The IUCN Regulations provide:

- 45bis. Council may appoint members of Council as IUCN Council Global Focal Persons, for a period up to the end of the term for which s/he has been elected, with the purpose of:
- (a) increasing the understanding in Council on a specific matter and the inclusiveness of its deliberations;
 - (b) contributing to raise the profile of IUCN's work with key stakeholders;
 - (c) promoting a strong focus and coherent body of work across IUCN on the issue concerned by liaising with the Secretariat, the Commissions and Members; and
 - (d) bringing her/his perspective and advice to the Council through the relevant committee of the Council, including policy, governance, and resourcing implications.

COUNCIL DECISION C109/29 (May 2023)

The IUCN Council,
on the recommendation of the Programme and Policy Committee (PPC),
appoints Ms Lolita Gibbons as the IUCN Council Global Focal Person for Oceans.

CONTEXT

Why are oceans important for IUCN?

- Oceans cover 70% of our planet's surface, and over two thirds of the oceans lie beyond national jurisdictions
- The oceans produce nearly half of the oxygen we breathe, and have absorbed 30% of the anthropogenic emissions of CO₂ and around 93% of the added heat arising from human-driven changes to the atmosphere

Global ocean challenges?

- There are no solutions to global climate change or the global biodiversity crisis without action on the world's oceans
- Many Island Countries and Territories are large oceanic entities and are at the frontline of a changing climate and sea level rise
- More than 1,550 marine species are at risk of extinction, based on the IUCN Red List of

Threatened Species

- Mangroves provide ecosystem services worth up to US\$57,000 ha/year and help mitigate and adapt to climate change
- Over-exploitation, ship strikes, fisheries bycatch and entanglement with fishing gear are major causes of mortality of many threatened and endangered marine species
- Underwater noise from human activities varies across ocean basins, but has increased in some regions by 3 decibels per decade and continues to increase in many regions globally, altering marine mammal and fish behaviour
- Invasive alien species are the second biggest driver of species extinctions globally, and the number of new introductions show no signs of slowing, with one new marine biological invasion being reported every nine weeks
- 18.7% of the waters under national jurisdiction and 1.44% of the global oceans (High Seas) are designated Marine Protected Areas (MPAs)¹
- Over 55% of the world's ocean is fished²
- Illegal, unregulated and unreported fishing in combination with fishing practices that destroy habitats and overfishing has reduced populations of many commercially important fish and other marine species to critically low levels
- Over 8 - 10 million metric tons of plastic enter the ocean annually, and other land-based sources of marine pollution (sediments, nutrient, pesticides and other industrial chemicals) are impacting biodiversity at increasing scales and entering food chains
- Deep sea mining has emerged as a significant threat to biodiversity and unique habitats
- Ocean governance is largely sectoral (e.g. fishing, shipping, mining) and with poor integration and coordination between sectors

As a result of these and other issues, oceans and ocean conservation are receiving increasing attention at global, regional and national levels, by governments, NGOs, intergovernmental agencies and organisations, the media, and elements of the corporate sector.

OCEAN ISSUES RECEIVING ATTENTION BY IUCN INCLUDE:

- Cetaceans
- Climate change – consequences of ocean warming, acidification, deoxygenation, sea level rise, blue carbon
- Biodiversity conservation and marine protected areas (MPAs)
- Threatened marine species
- Fisheries management, and the impact of fisheries on biodiversity
- Marine debris, and plastics in particular
- Disaster risk reduction through nature-based solutions

² [Half the Ocean: Updating The Global Footprint of Fisheries - Global Fishing Watch](https://www.globalfishingwatch.org/)

- Livelihoods and sustainable use of marine species/resources
