- 4.1. Your Proposal must consist of the following four separate documents:
 - Signed Declaration of Undertaking (see Attachment 2)

- Technical Proposal (see Section 4.3 below)
- Financial Proposal (see Section 4.4 below)

Proposals must be prepared in English.

4.2. Your Proposal must be submitted by email to the IUCN Contact (see Section 2). The subject heading of the email shall be [RfP Reference – bidder name]. 4.3. *Technical Proposal*

The Technical Proposal must address each of the criteria stated below explicitly and separately, quoting the relevant criteria reference number (left-hand column).

Where CVs are requested, these must be of the individuals who will actually carry out the work specified. The individuals you put forward may only be substituted with IUCN's approval.

IUCN will evaluate Technical Proposals with regards to each of the following criteria and their relative importance:

4.4. *Financial Proposal*

- 4.4.1. The Financial Proposal must be a fixed and firm price for the provision of the goods/services stated in the RfP in their entirety.

The maximum budget available for this consultancy is 20,000 € (VAT and all taxes incl.*)

** VAT and other taxes are included in the abovementioned amount. IUCN is not acting as a business or professional nature entity for VAT purposes and therefore the consultant should charge in its invoices the VAT or analogous tax accordingly. In case that the consultant is exempt of VAT or equivalent tax in its jurisdiction, it should include a note in the invoice document informing of this issue and mentioning the law that applies.*

4.4.2. *Prices include all costs*

Submitted rates and prices are deemed to include all costs, insurances, taxes, fees, expenses, liabilities, obligations, risk and other things necessary for the performance of the Terms of Reference or Specification of Requirements. IUCN will not accept charges beyond those clearly stated in the Financial Proposal. This includes applicable withholding taxes and similar. It is your responsibility to determine whether such taxes apply to your organisation and to include them in your Financial Proposal.

4.4.3. *Currency of proposed rates and prices*

All rates and prices submitted by Proposers shall be in Euros. Financial proposals shall include a breakdown of costs and include daily rates.

- 4.5. Additional information not requested by IUCN should not be included in your Proposal and will not be considered in the evaluation.
- 4.6. Your Proposal must remain valid and capable of acceptance by IUCN for a period of 90 calendar days following the submission deadline.
- 4.7. *Withdrawals and Changes*

You may freely withdraw or change your Proposal at any time prior to the submission deadline by written notice to the IUCN Contact. However, in order to reduce the risk of fraud, no changes or withdrawals will be accepted after the submission deadline.

5. **EVALUATION OF PROPOSALS**

5.1. *Completeness*

IUCN will firstly check your Proposal for completeness. Incomplete Proposals will not be considered further.

5.2. *Pre-Qualification Criteria*

Only Proposals that meet all of the pre-qualification criteria will be evaluated.

5.3. *Technical Evaluation*

5.3.1. *Scoring Method*

Your Proposal will be assigned a score from 0 to 10 for each of the technical evaluation criteria, such that '0' is low and '10' is high.

5.3.2. *Minimum Quality Thresholds*

Proposals that receive a score of '0' for any of the criteria will not be considered further.

5.3.3. *Technical Score*

Your score for each technical evaluation criterion will be multiplied with the respective relative weight (see Section 4.4) and these weighted scores added together to give your Proposal's overall technical score.

5.4. *Financial Evaluation and Financial Scores*

The financial evaluation will be based upon the full total price you submit. Your Financial Proposal will receive a score calculated by dividing the lowest Financial Proposal that has passed the minimum quality thresholds by the total price of your Financial Proposal.

Thus, for example, if your Financial Proposal is for a total of CHF 100 and the lowest Financial Proposal is CHF 80, you will receive a financial score of $80/100 = 80\%$

5.5. *Total Score*

Your Proposal's total score will be calculated as the weighted sum of your technical score and your financial score.

The relative weights will be:

Technical:	70%
Financial:	30%

Thus, for example, if your technical score is 83% and your financial score is 77%, you will receive a total score of $83 * 70\% + 77 * 30\% = 58.1\% + 23.1\% = 81.2\%$.

Subject to the requirements in Sections 4 and 7, IUCN will award the contract to the bidder whose Proposal achieves the highest total score.

6. EXPLANATION OF PROCUREMENT PROCEDURE

- 6.1. IUCN is using the Open Procedure for this procurement. This means that the contracting opportunity is published on IUCN's website and open to all interested parties to take part, subject to the conditions in Section 7 below.
- 6.2. You are welcome to ask questions or seek clarification regarding this procurement. Please email the IUCN Contact (see Section 2), taking note of the deadline for submission of questions in Section 3.1.
- 6.3. All Proposals must be received by the submission deadline in Section 3.1 above. Late Proposals will not be considered. All Proposals received by the submission deadline will be evaluated by a team of evaluators in accordance with the evaluation criteria stated in this RfP. No other criteria will be used to evaluate Proposals. The contract will be awarded to the bidder whose Proposal received the highest Total Score. IUCN does, however, reserve the right to cancel the procurement and not award a contract at all.
- 6.4. IUCN will contact the bidder with the highest-scoring Proposal to finalise the contract. We will contact unsuccessful bidders after the contract has been awarded. The timetable in Section 3.1 gives an estimate of when we expect to have completed the contract award, but this date may change depending on how long the evaluation of Proposals takes.

A bidder who submits or participates in more than one Proposal (other than as a subcontractor or in cases of alternatives that have been permitted or requested) shall cause all the Proposals with the bidder's participation to be disqualified.

If you have a complaint or concern regarding the propriety of how a competitive process is or has been executed, then please contact procurement@iucn.org. Such complaints or concerns will be treated as confidential and are not considered in breach of the above restrictions on communication (Section 2.1).

Headquartered in Switzerland, IUCN Secretariat comprises around 1,000 staff with offices in more than 60 countries.

Created in 1948, IUCN is now the world's largest and most diverse environmental network, harnessing the knowledge, resources and reach of more than 1,400 Member organisations and some 16,000 experts. It is a leading provider of conservation data, assessments and analysis. Its broad membership enables IUCN to fill the role of incubator and trusted repository of best practices, tools and international standards.

IUCN provides a neutral space in which diverse stakeholders including governments, NGOs, scientists, businesses, local communities, indigenous peoples organisations and others can work together to forge and implement solutions to environmental challenges and achieve sustainable development.

Working with many partners and supporters, IUCN implements a large and diverse portfolio of conservation projects worldwide. Combining the latest science with the traditional knowledge of local communities, these projects work to reverse habitat loss, restore ecosystems and improve people's well-being.

Terms of Reference for IUCN Consultancy

Title: Blue Carbon Strategy for the Mediterranean

Objective of the Consultancy

This consultancy has the following objective(s):

1. **Produce a desk-based literature review** highlighting key existing Blue Carbon Strategies, projects and initiatives within and outside of the Mediterranean. The review shall synthesize the key elements of the researched strategies as well as identify any gaps for the appropriate management of blue carbon ecosystems.
2. **Identify the most relevant organisations regarding Posidonia and other Mediterranean seagrasses**, with the aim of collaborating for the development of a Mediterranean Blue Carbon Strategy. The Consultant is expected to produce a shortlist of relevant organisations confirmed by IUCN, with whom the Consultant will conduct interviews and questionnaires in order to gather feedback regarding the current status of Posidonia, structuring a Blue Carbon Strategy, identifying key issues, etc. IUCN will support the Consultant in establishing contact with the identified organisations as necessary.
3. **Support IUCN-Med in the organisation of two online meetings to:**
 - a) Present the results of the literature review, list of relevant organisations and proposed outline of the Mediterranean Blue Carbon Strategy
 - b) Present the Mediterranean Blue Carbon Strategy to relevant stakeholders and gather feedback
4. **Produce a Blue Carbon Strategy for the Mediterranean** to be implemented at the regional level (including text, images/infographics/illustrations and layout). The Strategy, based on the previous steps, should include at least the following priority areas:
 - a. Conservation of blue carbon ecosystems and supporting their adaptation to climate change, including passive restoration actions
 - b. Links to relevant Mediterranean/national policy frameworks and planning and management strategies. Embedding blue carbon as a key element of coastal and marine policy planning and management.

- c. Promoting pathways for blue carbon investment, financial mechanisms and blue carbon markets
- d. Blue carbon certification schemes
- e. Progressing long-term blue carbon research and projects

Background

Project Reference: DR04342.37 P2 Policy influencing
Donor reference: Hans Wilsdorf Foundation

About the Consultancy

Blue carbon is the organic carbon stored in coastal and marine ecosystems such as mangroves, seagrass meadows and tidal marshes. 95 % of the organic carbon stored within coastal ecosystems is found within the soils, however, it is also stored within the living biomass (leaves, branches, stems and roots) as well as the non-living biomass (litter and dead wood). If undisturbed, blue carbon ecosystems can retain organic carbon in soils for hundreds and even thousands of years¹. Indeed, they have significant value for climate change adaptation and play a key role in reducing greenhouse gas emissions both globally and in the Mediterranean. As a result, blue carbon ecosystems are recognised for their potential in supporting the implementation of Nature-based Solutions (NbS) for countries to help meet climate change commitments under the Paris Agreement.

However, blue carbon ecosystems are globally threatened with habitat loss and degradation from impacts such as coastal development, recreational boating, anchoring, fisheries and bottom trawling, pollution as well as climate change, including sea level rise. If degraded, blue carbon ecosystems can release the carbon they store, turning them from carbon sequesters to releasers of greenhouse gas emissions. In fact, it is estimated that one billion tonnes of carbon dioxide are released annually from degraded blue carbon ecosystems, equivalent to nearly 20% of global emissions from deforestation².

The Mediterranean region is a biodiversity hotspot facing serious challenges due to the impacts of human-induced climate change. The region is warming 20% faster than the global average, with coastal zones facing heightened disaster risks including flooding and erosion, putting pressure on already strained ecosystems and vulnerable economies. Mediterranean coastal blue carbon ecosystems such as seagrass meadows and salt marshes have been identified as important carbon sinks. Despite increased attention being paid to Mediterranean blue carbon ecosystems as well as the development of regional initiatives in recent years, a regional Mediterranean Blue Carbon Strategy has yet to be developed.

Description of the Assignment

The Consultant is expected to assist IUCN-Med in the development of a Mediterranean Blue Carbon Strategy, which aims to support the development of evidence-based projects and
