Combating Wildlife Trafficking

Wildlife Trafficking is one of the most pressing environmental issues today. It threatens a vast array of species around the world including iconic animals such as the African elephant and rhinos, and many less charismatic species, including plants, as well as local communities, national security and sustainable development.

The objective of the events within this journey is to highlight the serious threat wildlife trafficking poses to biodiversity and provide a space in which Congress attendees can better understand the issues, debate the challenges and formulate innovative and effective solutions.

In particular, it seeks to focus attention on the added value IUCN can deliver in tackling wildlife trafficking through its One Programme approach, which involves government and NGO members, Council, National and Regional Committees of Members, Commissions and the Secretariat working together.

Combatting Wildlife Trafficking

Time	Session ID	Title	Type	Location
Friday 2 September 2016				
11:30 - 12:00	12428	Multi-sensor alarm system for the world's protected areas	Pavilion event	Species Conservation Pavilion

* *The Combatting Wildlife Trafficking Journey is not a comprehensive list of events relevant to illegal wildlife trade. Use the Congress App to create your own personal journey. The events search function on the Congress Portal is also a very effective tool. See <https://portals.iucn.org/congress/sessions>.*

Meeting Point

Please don't forget to touch base with fellow travelers and stop at The Species Pavilion. The Species Pavilion will host some of the events in this journey as well as related events and Pavilion staff will provide you with additional information.

Location: Exhibit Hall of the Congress Venue
