Grant Detailed Information

Pacific Asia Travel Foundation

Grants for Sustainable Tourism 2017

Deadline: 10 August 2016

Principal Office: International

The Pacific Asia Travel Association (PATA) makes grants for projects in environmental and cultural heritage that contribute to sustainable tourism in the Asia-Pacific region. The grants support environmental conservation and wildlife protection, heritage conservation, and education and awareness about these issues. The majority of grants are to organizations based in Asia-Pacific developing countries and territories. Each application requires references, one of which must be a PATA chapter. The application deadline is 10 August 2016.

Grant Detailed Information

U.S. Department of State

Combating Wildlife Trafficking in Southeast Asia

Deadline: 10 August 2016

Principal Office: USA

The U.S. Department of State seeks to build civilian law enforcement capabilities to combat wildlife crime in Southeast Asia. The aim is to strengthen legislative and regulatory frameworks; build investigative and enforcement capacity; and enhance prosecutorial and judicial capacity. The focus countries are Indonesia, Laos, Malaysia, Philippines, Thailand, and Vietnam. Multinational or regional activities that foster transnational cooperation may also benefit Cambodia and Myanmar (Burma). Eligibility for funding extends to nonprofit NGOs and educational institutions in the USA and other countries, including consortia of local and non-local organizations. The program has US\$1.6 million to make up to three grants for a project period of two years. The closing date for applications is 10 August 2016

|---|------------------------|-----------------------|--|--|-------------------------|---------------------|
| Toyota Environmental Activities Grant Program | Program Outline | Application Procedure | Screening Process and Selection Criteria | Download of Information for Applicants and Agreement Forms | Previous Grant Projects | Contact Information |
|---|------------------------|-----------------------|--|--|-------------------------|---------------------|

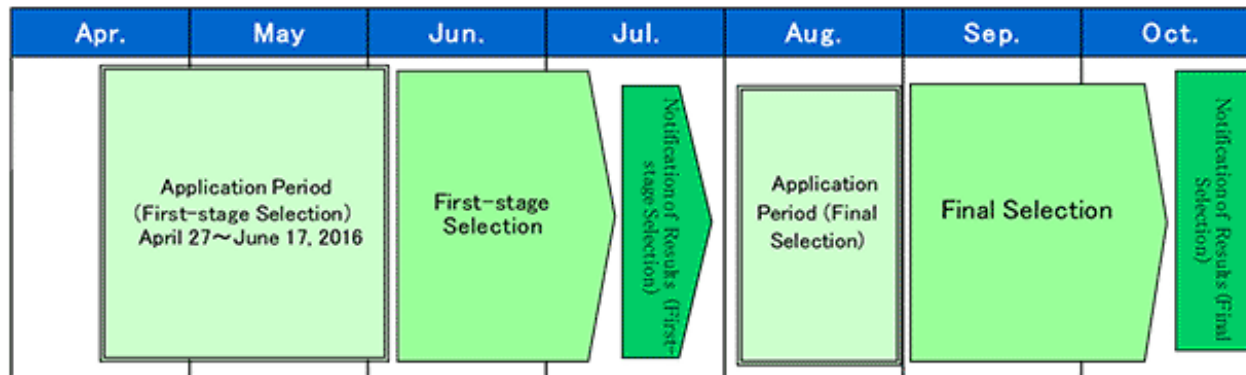

Program Outline

Symbiotic relationship between human activities and the environment is critical for the development of economically-sound and stable societies in the twenty-first century. To build sustainable societies, both present and future generation must recognize their responsibility for preserving world resources and overcome international environmental challenges.

Toyota Motor Corporation (TOYOTA) recognizes environmental issues as a top management priority for sustainable development with advanced and diversified technologies, for the purpose of gaining trust and respect of all the customers around the world. With

Schedule for selection

Two-staged selection (first-stage selection/ final selection) will be conducted. Projects being qualified the first-stage selection will be required another application form for the final selection.

The PATA Foundation's Objectives

- To contribute to the conservation of the environment and cultural heritage of Asia Pacific, and to encourage travel and tourism industry stakeholders to reinvest in Asia Pacific destinations
- To help people in Asia Pacific countries acquire the tools they need to become better stewards of their environment and cultural heritage, and to foster economic solutions to conservation problems
- To give PATA and the travel and tourism industry a stronger voice in the international debate on environmental and cultural heritage conservation
- To support educational initiatives that target travel and tourism stakeholders, including residents of destination communities, visitors and industry employees, to make all parties aware of their impact on cultural heritage and the environment.

What Kind of Projects Receive Foundation Grants?

Projects that are considered deserving of a PATA Foundation grant are those that seek to protect, conserve and/or educate. They usually have one or more of the following objectives:

- Protect the natural environment, including wildlife
- Conserve cultural heritage, including arts and crafts, heritage sites and historic buildings
- Educate people on the importance of environmental and cultural heritage.

Any project seeking the Foundation's help must also have:

- A potential positive impact on tourism
- Contribute to the betterment of lives and provide job creation in tourism for local communities.
- The support of their respective local PATA chapter
- Financial support from the local PATA chapter or other sources.

The Foundation opens for applications for 2017 grants. The submission deadline is **August 10, 2016**. E-mail: foundation@PATA.org.

rare inspires change so people and nature thrive

pride campaigns

Rare partners with local organizations to run comprehensive marketing campaigns, called Pride campaigns, to inspire communities to take pride in their natural resources. Pride sparks and builds community support for the adoption of more sustainable behaviors, the bright spot. **Rare turns conservationists into skilled social scientists** by training them to research and analyze community motivators and message the need for change in a way that appeals to hearts and minds. [Learn more about Pride campaigns >](#)

solutionology

find what works. repeat it.

Around the world bright spots of hope exist — sometimes in the least expected places carried out by the most unassuming people. Rare seeks out these proven, locally-led conservation solutions that benefit people and nature. Rare helps local communities tailor the solutions to meet their needs so the change endures long after Rare's direct involvement ends.

fisheries

Global demand for fish has pushed the oceans to its limits. The good news for the billions who depend on fish for food and livelihoods is that properly managed marine ecosystems can rebound relatively quickly. Rare has identified successful coastal solutions and is bringing them to communities around the world.

GLOBAL FELLOWSHIPS IN MARINE CONSERVATION

APPLICATION DEADLINE: FEBRUARY 1 (PENDING FUNDING)

The Duke University Marine Laboratory is offering an unparalleled educational opportunity from July 11 - August 12, 2016. Duke's Marine Conservation Summer Institute focuses on principles necessary for the conservation and preservation of coastal and ocean environments during an intensive 5-week summer session. The emphasis is on interdisciplinary problem solving using biophysical and social science to address real world environmental problems. This program is an opportunity for students and professionals at any level to think about conservation biology and policy in an environment full of students, faculty and practitioners grappling with the same issues.

MINI-GRANTS IN MARINE CONSERVATION

Mini-Grants in Marine Science and Conservation have provided support for **Global Fellows** to implement marine conservation projects in their home countries. Funds for mini-grants are limited. Please check with Katie Wood about the availability of mini grant funds for 2016.

Deadline: February 1

Please contact katie.wood@duke.edu for additional information.

PAST MINI-GRANT AWARDS

1. Historical Whaling in the Philippines: Mapping Whaling Grounds and Comparison with Current Know Distribution (Jo Marie Acebes)
