#WCELEnvironmentWeek

Conservation and sustainable use of biological diversity is fundamental to the well-being of present and future generations. Yet, nature and its vital contributions to people are deteriorating worldwide. One of the five crucial levers to stop and reverse the loss of nature is environmental law and its implementation. This webinar will explore the environmental rule of law for protecting biodiversity. Scientists, decision-makers and lawyers will discuss the need for and the means of legal protection of nature. In particular, the panelists will address legal approaches that are needed and effective, the comparative use of emerging legal principles in biodiversity-related litigation, and the complexities of application of the environmental rule of law for upholding the rights of nature.

The webinar will close IUCN-WCEL Environment Week, a 5-day webinar series designed to explore emerging issues in environmental law leading up to [2021 World Environment Day](#). WCEL will provide language interpretation in English, French, and Spanish. Learn more and register [here](#).

Moderator
Professor Christina Voigt
University of Oslo
Chair, IUCN-WCEL Climate Change Specialist Group

Ms. Elizabeth Mrema, Executive
Secretary, Convention on Biological Diversity

Ms. Angela Andrade
Director of Environmental Policy, Conservation International -
Colombia, Chair, IUCN Commission on Ecosystem
Management

Professor Thomas Lovejoy
George Mason University

Dr. Jane Smart
Global Director, IUCN Biodiversity Conservation Group and
Director, IUCN Global Species Programme

Professor David Boyd
University of British Columbia
UN Special Rapporteur on Human Rights & the Environment
