#WCELEnvironmentWeek

The Environmental Rule of Law depends on the effective enforcement of and compliance with laws, regulations, and policies, including adequate criminal, civil, and administrative enforcement, liability for environmental damage, and mechanisms for timely, impartial, and independent dispute resolution. This webinar will bring together leading experts from different regions in the world to address the most compelling challenges to achieve climate justice, biodiversity conservation, and sustainability.

The webinar will be the third event in IUCN-WCEL Environment Week, a 5-day webinar series designed to explore emerging issues in environmental law leading up to [2021 World Environment Day](#). WCEL will provide language interpretation in English, French, and Spanish. Learn more and register [here](#).
