Integrate **E**cosystem-**b**ased **A**daptation
into Sub-national Development Planning
in Lao PDR

A European Union Global Climate
Change Alliance project

A PROJECT FUNDED BY THE EUROPEAN UNION

Global Climate Change Alliance Programme for Lao PDR

The Lao PDR Global Climate Change Alliance (GCCA) Programme, funded by the European Union, aims to support the design and implementation of development plans addressing climate change in Lao PDR by:

- Fostering institutional capacities development at the national and sub-national level
- Providing policy advice

Consistent with the GCCA, IUCN Lao PDR, in partnership with the Hamburg University of Applied Sciences (HAW) and the Lao Biodiversity Association (LBA), has developed the '**C**apacity **E**nhancement to integrate **E**cosystem-**b**ased **A**daptation into sub-national development planning in Lao PDR (CEEbA)' project.

CEEbA

With an implementation period of 4 years (2014-2018), CEEbA aims to strengthen the climate change-related institutional, policy and regulatory framework in the Lao PDR.

Targeting the northern provinces of Luang Prabang, Phongsaly and Houaphanh, the project will focus on building the capacities of local administrative institutions to integrate climate change and climate risks into development planning using an Ecosystem-based Adaptation approach.

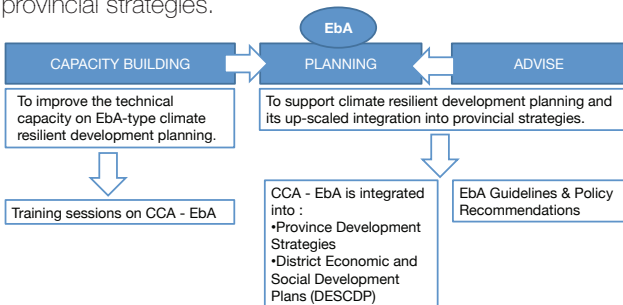

What is Ecosystem-based Adaptation?

Ecosystem-based Adaptation (EbA) integrates the use of biodiversity and ecosystem services into an overall strategy to help people adapt to the adverse impacts of climate change.

Programme Components

CEEbA will focus on two main intervention levels:

- 1. National level:** Mainstreaming EbA-type Climate Change Adaptation (CCA) into the National Adaptation Programme of Action to Climate Change (NAPA) priorities.
- 2. Sub-national level:** Capacity building for province and district staff on EbA, and integrating it into district plans and provincial strategies.

About IUCN

IUCN, International Union for Conservation of Nature, helps the world find pragmatic solutions to our most pressing environment and development challenges.

IUCN's work focuses on valuing and conserving nature, ensuring effective and equitable governance of its use, and deploying nature-based solutions to global challenges in climate, food and development.

About the European Union

The European Union is made up of 28 Member States who have decided to gradually link together their know-how, resources and destinies. Together, during a period of enlargement of 50 years, they have built a zone of stability, democracy and sustainable development whilst maintaining cultural diversity, tolerance and individual freedoms.

The European Union is committed to sharing its achievements and its values with countries and peoples beyond its borders.

This publication has been produced with the assistance of the European Union. The contents of this publication are the sole responsibility of IUCN and can in no way be taken to reflect the views of the European Union.
