Background:

Since 2007 IUCN has been implementing a six year program “Balochistan Partnerships for Sustainable Development Program” in the six districts of Balochistan. The program has three main objectives and several specific objectives to achieve its developmental target. Accordingly among others, BPSD under its objective of promoting sound environmental governance at district level through visioning, planning and implementation has developed the (IDDV) integrated district development vision for Quetta district. The integrated district development vision Quetta was developed after a long consultation with the stakeholders during 2009-2010. The development process of IDDV was participative since its development is the result of consultation meetings convened for different tiers of the society viz from grass root to higher level. A total number of 30 consultation meetings and workshops were held in the overall development process of IDDV Quetta.

The draft of IDDV Quetta was owned and approved by the Deputy Commissioner Quetta through a notification issued on 09, June, 2011. The issuance of the notification also affirmed the understanding of IUCN and district authorities that it would be mandatory for all district stakeholders to plan and implement their developmental agenda according to the true spirit of approved IDDV.

Accordingly IUCN planned to facilitate the district stakeholders to familiarize with the long term vision put forth by IDDV and to develop an action plan for implementing the recommendations of Quetta IDDV. A consultative work shop was organized on 03 November, 2011 at Serena Hotel Quetta to develop a detailed strategy for implementation of IDDV in the district. All major stakeholders working in different sectors and matching priority areas of district vision attended the workshop.

In action plan development workshop the stakeholders proposed number of interventions and identified possible partners in potential areas/sectors of governance, green, social, economic, disaster and environmental management. The stakeholders unanimously agreed that collaborative work could be done in implementing the recommendations of IDDV in future specially by matching and incorporating these interventions in Annual Developmental Programs (ADP) and Public Sector Development Programme (PSDP). IUCN Pakistan being the facilitator of the event also committed to provide technical assistance, as and when required by the stakeholders, in the areas of integrated water resources management, solid waste management, air pollution control and improvement of air quality, awareness raising in environmental management, rangeland improvement, , disaster risk management, natural resources management and capacity building of all relevant district line departments in the above mentioned programmatic areas, during the implementation of IDDV vision

Some government departments showed their interest to work with IUCN in their respective fields and some of the non- government organizations also committed to extend their support to the government line departments in the areas of forest conservation, , watershed management, information sharing, GIS and remote sensing, , health and hygiene, rangeland management. Conclusively all stakeholders jointly declared that coordination and cooperation among all shall be improved and strengthened for ensuring successful implementation of IDDV in Quetta District.

Objectives of the workshop:

The main aim of the event was to develop an action plan based on the recommendations and suggestions prescribed in the IDDV Quetta and to sensitize the stakeholders specifically, the government line departments to incorporate these recommendations in their Annual Developmental Programs (ADPs) and Public Sector Development Programme (PSDP) and to develop a road map of

partnership among different stake holders presently working in isolation and contributing towards the common goals and objectives.

The main objectives of consultation workshop were:

- a. To facilitate district administration and all stakeholders in implementing the IDDV recommendations
- b. To develop an "Action Plan" for implementing the recommendations of the IDDV Quetta.
- c. To sensitize the stakeholders for incorporation of IDDV recommendations in ADP and PSDP
- d. To develop the path for future interventions in the district.

Proceedings of the Workshop:

The workshop was planned and pre structured into three main parts viz. introductory session, presentation session and group work session. The proceedings of the workshop are briefly given as under:-

Introductory Session:

The workshop started at 10:30 am with the recitation from Holy Quran. Thereafter Mr. Mehboob Ali Environmental Governance Officer IUCN briefed the participants about the IDDV and its developmental vision. He explained that you are all would be aware of the development of a long term strategy in the name of integrated district development vision for Quetta district technically facilitated by IUCN and funded by Embassy of Kingdom of Netherlands. He said that this workshop is a continuation of the various consultation meetings which were convened IUCN from time to time in the years 2009 and 2010 to facilitate development of IDDV.

While explaining the objectives of the workshop he explained that IUCN has organized this participative workshop with the objective to prepare an action plan for implementation of recommendations suggested in IDDV and thereby prioritizing the issues and devise a mechanism for the implementation of IDDV.

Presentation Session:

In the second session of the workshop Mr. Zabardast Khan Bangash Manager, IUCN Balochistan program gave a detailed presentation on background, importance and purpose of Integrated District Development Vision, its salient features, positive and negative tributes, covered sectors with priority issues, possible solutions with regard to governance, social, green, economic development, environmental and disaster management. He described that IDDV is a planning tool which facilitate the policy and decision makers to incorporate the environmental considerations into the developmental activities and schemes. IDDV also entails guideline to the government funci adaptation of best management and conservation practices he added.

Mr. Zabardast Khan during presentation on IDDV Quetta

He informed that for development of IDDV Quetta the IUCN team and the consultant carried out extensive work and more than 75 consultation meetings workshops conducted and the first draft shared with stakeholders on 22 October, 2011 for review and comments. He also informed the

participants that the district administration owned and approved IDDQ Quetta through a notification on 9th June 2011.

He further added the participant that the workshop is arranged to develop an action plan of Quetta District based on the recommendations and suggestions conceived by the participants to mainstream the track for attaining the common goals and objectives of IDDQ Quetta.

He solicited that after success full implementation of IDDQ Quetta citizens would become well educated and opportunities of economic development and healthy environment would be available to them for their prosperity. It will indeed play a vital role in attaining basic necessities of life and a society where people can enjoy justice and equity irrespective of gender and

religion. He also said that the advocacy with regard to Integrated District Development Vision (IDDQ) by IUCN will indeed be a great support for the inhabitants of District Quetta. He further added to its solicitation that the repetition of such advocacy in all districts of Balochistan will make people realize that by adopting simple and doable practices of our forefather we can easily overcome the wrong practices that are hurdle in attaining sustainable development and environmental protection in their respective areas. Throughout his presentation, the participants were engrossed by the developmental vision put forth by him and enjoyed the information imparted. The participants appreciated the presentation and asked many questions on IDDQ implementation and shared their comments

one by one. The first session was ended having a break for tea.

Group Work Session:

After the tea break Mr. Zabardast Khan Bangash briefed the participants on action plan development and explained them as to how fill up the format /template prepared for the purpose.

The participants were divided into six groups and requested to join their sectors of interest to share their experience, ideas and suggestions. The participants joined their interested group and started filling in the format given to each group

All the groups started brainstorming discussion, whereby IUCN staff facilitated the groups in their discussions. At the end of the session, the all groups came up with valid recommendations for

formulation of action plan and implementation for IDDV Quetta District.

A list and set of the proposed interventions and recommendations in favor of each sector are attached as **Annexure- A**

A list of participants and stakeholders of the Action Plan workshop is attached as **Annexure-B.**

In the end Manager IUCN Balochistan Program, Mr. Zabardast Khan Bangash in his closing remarks thanked all the participants for showing their interests toward developing of an action plan for the implementation of IDDV Quetta district.

Conclusion:

The event was successful in developing an action plan for implementation of IDDV Quetta at local level. It is envisaged that this action plan will prove to be a start point for combined and joint efforts of all the stake holders of the district. It is hoped that this action plan will be followed by all the stake holders / partners in future specially at the time of developing (ADP) annual development programs and (PSDP) public sector development programs and schemes.

Annexure-A

Balochistan Partnership for sustainable Development

Action Plan Development on Implementation of IDDV Quetta District

Thematic Areas	Proposed interventions
Environmental Management Sector	Promulgation of environmental laws
	Environmental Impact assessment to be conducted
	Encourage forestation
	Segregation of waste at household level
	Awareness of 3R(Reuse, Reduce, Recycle)
	Availability of dumping sites in the city.
	Conservation of energy resources
	Awareness through mass media to conserve water and to control the other prevailing wrong practices pertaining to pollution of water
	Introduce water metering system.
	Construction of small dams for conservation of rain water and ground water recharge.
	Ban the subsidy on Agriculture tube wells
